Siemens V94.2 Gas Turbine Generator

Siemens V94.2 Gas Turbine Generator

Description

Manufacturer	Siemens
Model (gas turbine)	V94.2
Year	1993
Condition	Good
Qty available	2
Power Output	140 MW
Major Overhauls (MOH)	Performed 7 times across the two units
Running Hours	91,959 hours
Frequency	50Hz
Fuel Type	Natural gas

Siemens V94.2 Gas Turbine Generator

Background & Upgrade History

- 1995: The units were put into commercial operation, originally running on diesel fuel.
- 2003: The fuel system was converted from diesel to natural gas.
- 2014: The units received an upgrade to a Low-NOx combustion system (DLN), which reduced NOx emissions to below 10 ppm.
- 2016: A 10-year Contractual Service Agreement (CSA) was signed with Siemens Energy
- 2025: Both gas turbine packages were normally stopped on December 1st.
