Kemet 24 Lapping Machine

Kemet 24 Lapping Machine

Description

Machine Type	Lapping and Polishing Machine
Model	Kemet 24
Year	2023
Condition	Used (Light Use)
Maximum Diameter Capacity	248mm (3 ring) / 209mm (4 ring)
Speed Options	Variable, up to 70rpm
Abrasive System	Integrated Kemet Electronic Dispensing
Frame Type	Welded Tubular Steel Frame
Electrical Compliance	EN 60 204

Kemet 24 Lapping Machine

Technical Details

Product Overview

The Kemet 24 is a high-quality floor-standing lapping and polishing machine designed for precision surface finishing. It features a robust steel frame and is equipped with an integrated abrasive dispensing system for precise control. Ideal for producing optically flat surfaces, it can handle parts up to 248mm in diameter.

Key Features

Parts Capacity:

- 248mm diameter (3 ring)
- 209mm diameter (4 ring)

Surface Quality:

- Produces optically flat surfaces with a high precision finish.

Abrasive Dispensing:

- Kemet Electronic Dispensing System for accurate diamond abrasive application, reducing costs.

Built-in Abrasive System:

- For conditioning Kemet Plates.

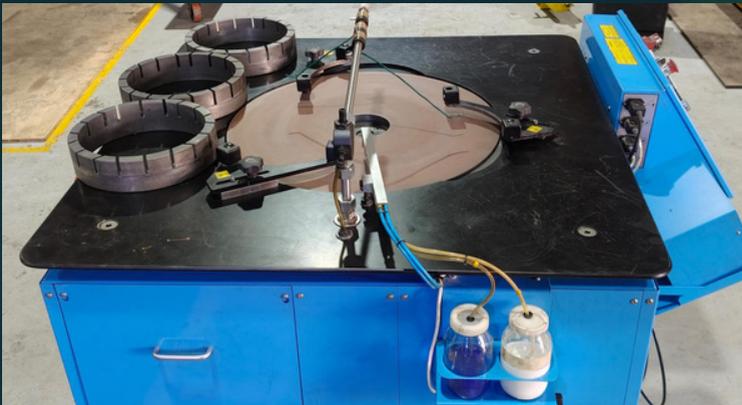

Frame Construction:

- Rigid welded tubular steel frame.

Electrical Compliance:

- Meets EN 60 204 standards.
